2023

Quaestio Capital SGR S.p.A.

Generated 15-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2023 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

Since 2013 our firm has been strongly committed toward responsible investments by endeavoring not to invest in CO2 polluters, UN Global Compact Violators and non-democratic countries. Furthermore, Quaestio embraces a quality investing approach which is, by construction, highly correlated to ethical and governance themes.

We firmly consider responsible investment as the natural continuation of our investment philosophy. In fact, with an increasing awareness and attention by investors and customers about environmental and social externality, the long-term value creation become indissolubly linked to sustainable investing, which may be carried out using different ESG metrics.

Our organization's approach to responsible investment substantially follows three different dimensions:

a) Following our System of Values, a combination of Negative Screening and Best in class approach has been implemented in order to define which investment areas are allowed and where to direct the majority of our investments. We are currently blacklisting specific sectors such as non-conventional weapons producers and companies that violate UN GC Principles. In addition, an extensive and dynamic evaluation list is carried out in order to consider specific companies which are not acting coherently with our System of Values, such as human fundamental rights violators or nations with limited freedom or democracy, but also to temporarily ban specific issuer linked to ESG scarce transparency or controversies. Finally, in order to meet our customers' needs, we've also developed a "Violators' swap" mechanism which allow us to implement a financial hedge on single names while pursuing our active ownership activities. The best in class approach is based on internal proprietary ratings which are based on both internal analysis and third party data.

b) An ESG monitoring has been implemented for each product. This risk-based approach aims to support the value generation analysis carried out with traditional economical and financial metrics. Our organisation employs a third party provider for ESG valuation and Rating system which aim to make available a rigorous valuation of the company sensitivity to ESG themes. The core of this assessment is based on the UN 17 SDGs framework. This Sustainability approach looks at the investments' prospects and feasibility. That said, if on one hand the above mentioned two dimensions of exclusion and/or ESG risk assessment represent a current state valuation, this approach aims to anticipate future trends or factors (i.e., regulatory restrictions or resources scarcity) that may impact our overall investment strategy.

c) We also implement post-investment activities in order to act as an “active owner” and push the companies toward more sustainable or ESG valuable activities. This is pursued through stewardship activities, such as the “active engagement” and “Voting”.

We consider our approach consistently holistic, contiguous and not only limited to exclusionary policies and/or watch-lists, one of the main differences between ours and other market practices. In addition, we consider the Violator Swap logic, explained above, one other peculiar aspect.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

Within the reporting year, several efforts have been made in order to achieve the best possible progress towards responsible investment topics. In more detail:

- a) Our company's ESG investing policy has been revised and updated in order to be aligned with the current best practice while including innovative activities alongside the common practices.
- b) We have expanded the granularity and the quantity of ESG research which we are receiving from third party rating providers.
- c) We have developed an internal rating model based on our system of values which is running in parallel with the ratings provided by third party providers.
- d) New tools have been developed for our Portfolio Managers in order to enhance their analysis on the single companies with our ESG dataset.
- e) The ESG Committee is now independent and directly reporting to the Board of Directors. It has been appointed in order to evaluate opportunities with external participants (as the shareholders of our company), but also to share knowledge and best practices. Such committee include both internal and external members with different skills and capabilities.
- f) We developed (and still continuously enhance) an investment monitoring and reporting tool aimed to embody also ESG sensitive metrics such as CO2, Water Usage and Waste footprints (where applicable). The purpose of this tool is also to make it available to our investors.
- g) We have developed an internal rating framework to independently rate our investments in Private Assets
- h) Stewardship activities have been enhanced, mainly through an active and collaborative engagement approach. All the activities have been reported to the Investment Committee, in order to define the best, ESG compliant, solutions.
- i) We subscribed the Carbon Disclosure project, aimed to stimulate the more polluting sector to decarbonize.
- j) Also in 2022 our company obtained a compliance certification, issued by the Italian Episcopal Conference, related to Catholic Church investment principles and ethics.

Section 3. Next steps

■ What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

- a) Enhance our product offering with the 2019/2088 EU Regulation requirements and classifying our product in compliance with the Sustainable Finance Disclosure Regulation;
- b) Continuously improving our monitoring tool, specifically to have available all ESG thematic interactions between our organization and providers, companies and investment managers;
- c) enhance our proprietary framework used for the private assets.;
- d) empower our ESG dedicated resources through the development of our ESG teams;
- e) Appointment of additional managers with a clear sustainability strategy;
- f) collaboration with other programs/networks;

Internally managed

(G) Fixed income – securitised

Securitized Instruments represent a specific investment type for which we do not believe ESG integration plays a key role in the investment decisions. This consideration is mainly based on the peculiarities inherent to the asset type and the investment structure, generally representing the bought of shares/debt instrument issued from SPVs that relies on deep diversification from the assets invested (as loans or Mortgages). We acknowledge that ESG metrics are increasingly available even for the specific asset type, but per our knowledge they mainly refer to the ultimate issuers (mainly Banks or Financial Players) features. Our Company will be ready to integrate ESG considerations and metrics for this kind of assets once reliable and generally accepted from the financial community.

(O) Other

Within the "Other Assets" definition we include cash, derivatives and any other asset for which ESG factors are considered inapplicable. The inapplicability of the ESG analysis is mainly focused on i) instrument type, ii) coverage and maturity of ESG metrics, where available. For third party funds, ESG monitoring is conducted via the acquisition and monitoring of the ESG rating and other metrics as footprints and controversy-related parameters. The Externally managed funds we are referring to are not directly comparable to the Externally Managed Pooled Investment (which fall within the definition of Externally Managed Assets from the PRI). The % AuM invested in Third Party Funds is considered negligible.

Explain why: (Voluntary)

Discretion and subjectivity on ESG issues is still very high. Therefore, imposing KPIs to evaluate the performance of our board members, trustees, or equivalent could even be counterproductive. We prefer to introduce these KPIs at a later stage, when there will be a greater consensus on the priorities related to the ESG topics. In order to quantify our overall positioning and conduct versus the market state, we ceaselessly conduct comparison between our portfolios and benchmarks related to market index, evaluating our current performance also in terms of ESG positioning, with the aim to provide a resilient and aligned result compared to the market index.

Did your organisation, or the external investment managers or service providers acting on your behalf, engage with policy makers as part of your responsible investment approach during the reporting year?

- (A) Yes, we engaged with policy makers directly
- (B) Yes, we engaged with policy makers through the leadership of or active participation in working groups or collaborative initiatives, including via the PRI
- (C) Yes, we were members of, supported, or were in another way affiliated with third party organisations, including trade associations and non-profit organisations, that engage with policy makers, excluding the PRI
- (D) We did not engage with policy makers directly or indirectly during the reporting year beyond our membership in the PRI

Explain why: (Voluntary)

Engagement with policy makers require capability, budget and time in order to create a structured process which could be complex to be attained by our asset management company, due to our size. Therefore, we prefer to focus on engagement with our corporate holdings.

Does your organisation have a process to identify, assess, and manage the climate-related risks (potentially) affecting your investments?

- (A) **Yes, we have a process to identify and assess climate-related risks**

(1) Describe your process

Sustainability risks are integrated into the Management Company or Investment Manager 's investment decision process in compliance with the provisions of Article 6 of SFDR. The aim of integrating sustainability risks in the investment decision process is to identify the occurrence of these risks as soon as operationally possible in order to take appropriate measures to limit the impact on the investments or the overall portfolio of the Sub-Funds. Key risk indicators can be used to assess sustainability risks, which can be of quantitative or qualitative nature and are based on ESG aspects and measure the risk of the aspects under consideration.

(2) Describe how this process is integrated into your overall risk management

The risk management function operates via two main action:

- 1) Evaluation of the model behind the quantitative ESG risk metrics used by investment managers in their investment decisions. The risk measures used need to be relevant and suitable for the purpose
- 2) On going monitoring of the investment decision such that they are in line with the ex art. 6 of SFDR. In case of breaching of the limit previously identified, the risk manager function operates signaling the problem to the investment manager. In case no action is taken from the IM the risk manager function will escalate to the CRO which will report to the ESG committee
